

How to claim Sophos' free Antivirus

LGFL and Sophos provide a free Antivirus to staff members of schools to use for their personal computers. This guide will show you how to claim Sophos Home with your work email.

First, navigate to the Sophos Home website with this link:

<https://home.sophos.com/en-us/employee/londongridforlearning>

Once on the website, scroll down until you see the box shown to the right. Enter your LGFLmail login

(Your school login
+ @Lgflmail.org)

If you've entered the correct email, you will receive an email from Sophos Home and click "Create Account"

To receive your license, please enter your work email below.

Your work email is used for verification purposes only. Later, you will be able to use your personal email to register for an account or upgrade your existing account.

Submit

You are eligible for a free license of Sophos Home Commercial Edition and its premium features for as long as your company participates in this program and you are employed by a participating company. If your company no longer participates in the program or you are no longer employed by that participating company when your license to Sophos Home Commercial Edition is up for renewal, your license to Sophos Home Commercial Edition will not be renewed, and instead your license will automatically revert to Sophos Home Free. With that transition to Sophos Home Free you will enjoy a level of protection, but you will no longer enjoy the premium features of Sophos Home Commercial Edition. See Sophos's website for additional details.

When you click to create an account, your unique coupon code should already be entered, if not it is in the original email. Fill out the rest of the information to create your account (Your email should be your personal email). When you create an account you should be sent an email to verify.

Once you've verified your email, log back in to Sophos Home's website and you should be met with the following page.

A screenshot of the Sophos Home Premium website. At the top, there is a notification banner with a megaphone icon, the text "Welcome to Sophos Home Premium", and a "Learn More" button. Below this is a main heading "Welcome to Sophos Home! Let's get started...". The central content area features an illustration of a computer desk with a monitor, a lamp, and a coffee cup. To the right of the illustration is the heading "Protect this PC" and a "Download" button. Below the illustration, there is text explaining that Sophos Home will scan and clean the machine upon installation. At the bottom of the page, there is a section titled "Want to protect a different device?" with a "Download" button and a URL field containing "https://accounts.home.sophos.com/install/".

Welcome to Sophos Home Premium
Check out our getting started guide! [Learn More](#)

Welcome to Sophos Home! Let's get started...

Protect this PC

Download Sophos Home on to your PC. Once installed it will automatically scan and clean your machine.

By clicking "Download", (i) you acknowledge that Sophos will process your personal data as described in the [Sophos Privacy Notice](#), and (ii) you confirm you have read, understood, and accepted the [Sophos Consumer Terms of Service](#).

[Download](#)

Want to protect a different device?

Sophos Home allows you to protect and manage multiple devices.

[Email install link to protect another household computer](#) or copy the link below

<https://accounts.home.sophos.com/install/>

You will now have the option to Download the antivirus onto your computer. You can also use the options under "Protect a different device" to put Sophos Home on another computer.

When you've downloaded the software, just run the file and it will install Sophos Home and begin protecting your device. Sophos home is currently available for windows and macOS computers.

Your free personal license will be valid for as long as you are working at an LGFL school.
